ASTR 1040 RECITATION 1 REVIEW + JUPYTER NOTEBOOK SETUP

8/29/2023

KIRK LONG | CU BOULDER

HOUSEKEEPING

Attendance is worth **15% of your grade,** so please show up and participate!

Treat each other with respect – we are all colleagues in this course and there are no "stupid" questions, so please ask if / when you feel confused / left behind. I'm here to help – feel free to interrupt me at any time!

We are fully in-person in D142.

These recitations are for you! Please provide constructive feedback to me as we go on, be engaged, and feel free to suggest topics for discussion.

INSTALLING JUPYTER NOTEBOOK

- Requirements: Linux, macOS, or Windows (no tablets / chromebooks)
  - Don't have a laptop / computer? Come talk to me!
- **Easiest way**: Download **Anaconda** (google)
- Harder way / for more experienced technical people: Add Jupyter to existing Python installation, run notebooks from either VSCode or server

OPEN DISCUSSION

Some example questions for your consideration:

- What are you nervous / excited for in this course?

- What other homework / logistics questions do you have?

- What general / esoteric questions do you have on the universe?

- What would you like to see in recitations?

- + whatever else you want to talk about!
